Appendix 6. Analyses performed and their purpose

Table A6.1

| Analysis | Figure | Purpose |
|---------------------------|----------------------|--------------------------------|
| Correlation analysis | Fig. A3.1 | To explore correlations |
| | | between pairs of drivers |
| Multiple linear | Fig. 4 | To compare how well the |
| regression | | models predict individual |
| | | ecosystem services |
| Hierarchical partitioning | Fig. A5.1 | To identify the relative |
| | | importance of each driver |
| | | variable |
| Principal component | Fig. 3 | To determine how the assessed |
| analysis of instrumental | | drivers and the assessed |
| variables (PCAIV) | | ecosystem services are related |
| | | to one another |
| Random forest | Fig. 5 and Fig. A3.1 | To compare how each model |
| | | predicts individual ecosystem |
| | | services and bundles of |
| | | ecosystem services |
