Notes

Village names have been anonymised

The total number of households per community was estimated using the average number of people per household and the total population of villages from the National Population Census data

Average number of people per household	6.1
Minimum number of people per household	1
Maximum number of people per household	17

Important to note that there may be several households in a physical dwelling. These families live under the same roof but eat and run things differently at a family level. E.g. Adult children who have their own children but still living together with their parents.
